All leaders in their class

### Man's Priceless Possessions

To keep one's head in times of emergency and crisis, remain cool, refrain from excess emotionality, hysteria and panic, is a sign of strength, and men and women who display these characteristics prove to be the real leaders of their fellow citizens. That leadership may be demonstrated without uttering a word or doing anything spectacular, but merely by being unafraid, natural and unswerving.

This truth was impressed upon the other day by an incident reported in the daily press in connection with a fire which broke out on a railway car between Moose Jaw and Regina. There was a rush of frightened passengers to the rear door. One man urged calmness and an orderly exit, but little heed was paid to him. But another passenger remained quietly in his seat, looking with unconcern out of the car window. His attitude impressed others with the fact that there was little danger and no need for undue alarm. People quieted down and a near panic was averted.

The world is passing through the stress and emergency of an unprecedented economic depression. It is a time to try the calibre of men and nations. Under prevailing conditions the striking of a small spark might easily cause an explosion, and a small flame spread into a great conflagration. There are individuals in all countries striving to take advantage of the present situation to stir up trouble. They are playing on the emotions of their fellow citizens, emotions which have been stirred to the depths by the personal problems, difficulties, sufferings and loss with which they have been and still are confronted. Times are ripe for the demagogue and the stirrer up of strife to ply their trade, reckless of what the final outcome might be.

But the strong men and women of the world, those who can be depended upon in times of emergency, are proving to be the real leaders in most countries. Where it is not so almost universal chaos would by now be the lot of people everywhere. In this time of testing, the Canadian people have demonstrated their sanity and their strength. Notwithstanding all our problems and difficulties, and these are in no sense or degree to be minimized, the people of Canada, taken as a whole, have kept their heads, remained cool, and avoided panic.

In some countries peoples have so lost confidence in themselves and so given way to panic and become the victims of emotionality, that they have sacrificed personal rights and liberties almost over night which it had taken generations of struggle by their forefathers to achieve for them. Thoughtlessly, in a spirit of panic, they surrendered some of the great fundamentals of life and living because they allowed others to unduly sway their emotions and neglected to keep cool and think for themselves rather than allow others to think and act for them.

Because this is so, the hands of the clock of progress have been turned back in such countries, and their future is dark and discouraging compared with those other nations where the people, and their leaders, have kept their feet firmly planted on the ground and their heads cool and minds clear. To-day in Canada and throughout the British Empire all people still enjoy that great safeguard of their liberties which is represented by a free and uncensored press and the utmost freedom in expression. Every man and woman, no matter what his or her station in life, is absolutely free to express opinions, publicly or privately, in relation to any and all matters of public policy. They are just as free to criticize and condemn as they are to applaud and praise. If they are dissatisfied and opposed to those presently in positions of authority, they are free to express their dissatisfaction and to organize to give force to their opposition.

No government agent sits in any newspaper office in Canada, no file of censorship orders lies on any editor's desk which must be obeyed. The radio, the pulpit, the public platform, is just as free to opponents of present governmental policies as they are to supporters of those policies. This is not so in many of the countries of the world. Hundreds of millions of people are now under the thumb of despots, and the rights of the people, the powers that be is prohibited, even the news of the day is censored, suppressed altogether, or colored to suit the views and policies of the prevailing dictator.

The essential fact for all Canadians to ever keep in mind is that, even if a so-called economic security could be obtained by them through these autocratic methods, the price to be paid is altogether too great. A slave may enjoy security provided by his master, but the fact remains he is a slave and nothing more, and what Canadian citizen desires to become a slave?

What the whole world is in danger of losing, unless the very people who have most to lose keep their heads, are the very fundamentals of civilization, namely, the liberties of the individual citizen. Once those personal liberties are lost, and might rather than right occupies the place of power and authority, it will be the great misfortune of the people, deprived of their democratic institutions and liberties, who will be the sufferers. Once lost the struggle to regain these priceless liberties will have to be re-commenced, because man was born to be free. The battle to restore civilization, liberty and equality will again have to be waged.

Liberty, freedom, personal rights are priceless possessions. They should never be surrendered for anything else, no matter how attractively that something else may be dressed up and presented. Nothing else, not everything else, can repay man for the loss of freedom of expression and liberty of action.

### New War On Grasshoppers

Menace Serious As Last Year  
Alberta Farmers Told

Just as relentless a war against grasshoppers will have to be waged this summer and fall as last year by Alberta farmers or tremendous financial loss will result. Lieut.-Col. E. H. Strickland, professor of entomology at the University of Alberta, who was a visitor in Calgary, stated:

It is known that millions of grasshoppers will be massed ready for action as soon as their feeding season begins, but the counter offensive is more highly organized than ever before, due to the experience in the past, resulting in a greater appreciation by farmers of the seriousness of the menace.

Col. Strickland stated that the present outlook in regard to the grasshopper menace was as serious as it was this time last year. In 1934, he said, very considerable damage was done by the insects, but the damage was inconsiderable when compared with the grasshopper plague between 1916 and 1927, when crops on farms everywhere in the province were wiped out.

Efforts are still being carried on to discover new methods to fight grasshoppers, according to Col. Strickland, but so far, the most practical and efficient method has been the systematic scattering of poison bait.

### A BARBER WHO HAD RHEUMATISM

#### Tells How He Carried On

A barber who had been "a martyr to rheumatism" writes: "I have been a martyr to rheumatism for some ten years. For five years I was so affected that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by profession. After having tried numerous remedies, I was finally advised to try Kruschen. I am pleased to say that after using Kruschen for some twelve months, I am now free from aches and pains that I have been for some ten years. In fact, I consider I am rid of rheumatism, thanks to Kruschen Salts."—W. M.

Two of the ingredients of Kruschen Salts are the most effective solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uric acid needles through the natural channel.

#### Shut Off From World

Four Nuns Working Among Primitive Tribes Of Papua

The four lone nuns of the world have passed through Port Moresby, Papua, on their way to what many must regard as a living grave.

They are nuns of the Carmelite Order. They have been to spend the rest of their lives in the silence and seclusion of a little convent built specially for them some 30 miles inland.

These four white women, who have dedicated themselves to a life of prayer and work among the primitive tribes of Papua, will live shut off from the rest of the world. They will occupy separate cells, and meet each other only in their little chapel for liturgical services.

By the rules of their Order, they must eat no meat, wear no stockings and shoes, sleep on straw, not look into a mirror, and have no correspondence.

#### Day Of Thanksgiving

Special Services Requested In All Canadian Churches

The Canada Gazette carried a proclamation requesting special thanksgiving services in all Canadian churches May 5 and setting aside May 6, the 25th anniversary of King George's accession, as a day of general thanksgiving and rejoicing on the occasion of our silver jubilee.

The thanksgiving services on the Sunday before jubilee day were described as giving an opportunity for "appropriate expression of gratitude to Almighty God for the manifold bounties and great mercies which our loving subjects, the people of Canada, have enjoyed during our reign."

Canadian cattle to the number of 13,592 head, in 27 shipments, were exported direct to Glasgow during the year 1934, as compared with 11,238 in 1933 and 4,016 in 1932. The quality was also greatly improved.

The more people become civilized, the more they increase their capacity for suffering. 2080.

### Little Journeys In Science

#### PROTEINS

(By Gordon H. Guest, M.A.)

Proteins are very complex substances which always contain the element nitrogen. Proteins cannot be formed without proteins, and thus we see that life itself is dependent upon them. The word protein comes from a Greek word meaning "to take the first place," because the importance of this group of substance was early recognized.

Proteins occur in all living matter and are present in all natural food stuffs. Due to the fact that they are the chief constituents of living animal tissue, they are most plentiful in animal foods, such as meat, eggs and fish.

Scientists have found proteins to be the most complicated substances ever studied. They have found that all proteins contain carbon, hydrogen, nitrogen, oxygen and sulphur. While some also contain phosphorus, small quantities of other elements are found in certain proteins.

Proteins are used by the body for building tissue, and also for producing energy. For providing the material for growth in children, and for repairing waste tissue in adults, they cannot be replaced by any other foods. The proteins obtained from animal foods, such as meat, milk and eggs are more valuable for these purposes than the proteins in vegetables. Milk is a valuable source of protein and is especially good for children.

Science has shown that there are thousands of different kinds of proteins varying in structure and quality. During the process of digestion, the proteins are decomposed into simpler substances, known as amino acids. These are absorbed and recomposed in new proportions, forming other proteins which have different properties than those which were taken into the stomach. Thus the proteins in food are different than those actually used by the body.

### A Pocket Submarine

Small Underwater Craft Valuable Addition To British Fleet

Britain's latest "pocket submarine," now being tested in the Channel, is showing remarkable qualities of seaworthiness, quick diving and deadliness in attack.

The submarine, the H.M.S. Shark, is a mere pigmy compared with the big overseas type of 1,500 tons which preceded her. She is barely 200 feet long, 24 feet broad, with a displacement of 370 tons. Yet she can "taxi" over 2,000 miles on the surface or, at full power, travel at nearly 15 miles per hour underwater.

For rapid diving she is unequalled by any other submarine. She can perform a crash dive in 30 seconds. In the bows are mounted six tubes for discharging the powerful 21-inch torpedo, a salvo of which would disable any battleship afloat. On deck two small quick-firing guns are mounted for use against hostile aircraft or light surface patrol.

Eleven of these powerful and handy little submarines are to be built. They are intended chiefly for coast defence, but would be quite capable of undertaking operations further afield if necessary. They have the additional advantage of being comparatively cheap, costing only about \$50,000 each.

### WOMAN'S AILMENTS

Miss Mary C. Kirby of 148 Main St., Woodstock, Ont., says: "I was in a real rundown condition. I had no rest at night, felt completely exhausted and nervous all the time and had frequent headaches. I required only one bottle of Dr. Pierce's Favorite Prescription to get me back to normal. I am now strong to carry on with my duties."

All requests for size, tablets 25 cts. liquid \$1.00. Large size, tablets 50 cts. liquid \$1.50. Write Dr. Pierce's Clinic, Buffalo, N. Y.

#### Get Pep Anyway

"Get Pep. Pup,"—hearing. Why not get "pepup"?—St. Thomas Times-Journal. And after being peptup in the all-too-customary manner just try saying "A pepup pet pup" and see what happens, says the Toronto Star.

Manchukuo is an independent state. So's matrimony.

### Lenin's Brain In Moscow

Now In 20,000 Pieces So Cells Can Be Examined

In Moscow, which has the largest collection of this sort in the world, the brains of the great and the abnormal are preserved.

Lenin's brain is there, and it is now in 20,000 pieces so that its cells can be examined.

And the curious thing is that it is in charge of a German brain specialist, without whose permission nobody may see it and who pays periodic visits to it from Germany.

Sir James H. Jeans, British astronomer, calculates that the sun is diminishing at approximately 250,000,000 tons a minute.

An idiot, as defined by one writer, is the motorist who crashes into the rear end of your car when you stop suddenly without signalling.

### London Zoo Takes Stock

Total Value Of Exhibits Is Forty Thousand Pounds

Stocktaking at the London Zoo has been completed, and it seems that the total value of all the animals, birds, and fish is about \$40,000. First there is Moira and Mok, the young gorillas. Moira and Mok are worth about \$800 each. Tigers have an easy lead over lions in cash value. A tiger is valued at \$80 and a lion at \$70. Flamingoes are \$12 10s. The three Indian rhinos deposited by the King, are the most valuable that the society possesses, and are worth \$1,000 each. They come from Nepal and are very rare.

It is not wisest to kill a man with a pistol than it is to kill him with the poison of criminal gossip. A golden rooster of 500 A.D. has been uncovered in Turkey.

## SCIENTISTS FIND FASTER WAY TO RELIEVE COLDS

1. Take 2 Aspirin Tablets

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

Ache and Discomfort Eased Almost Instantly Now

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the quick, safe way.

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

## Are you tired, run-down, irritable?

### Constipation steals your energy!

Thousands of sufferers from constipation have captured new health and vitality with Quaker Bran . . . a pleasant, natural corrective for constipation.

Gentle, safe and effective . . . It stimulates sluggish intestinal muscles . . . produces regular healthy bowel movement. Eat Quaker Natural Bran with your regular cereal or in delicious muffins and cookies.

A booklet of easy recipes is in every package.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

## Restore Wage Cuts

And Get A Rebuke From Premier Of Manitoba

The Winnipeg city council was rebuked in the Manitoba legislature by Premier John Bracken because it had restored wage cuts while accepting \$1,000,000 annually from the Manitoba government toward unemployment relief cuts.

Premier Bracken voiced his criticism after Mayor John Queen, a Labor member for Winnipeg, had suggested restoration of a seven per cent wage reduction to civil servants. Estimates were under discussion at the time.

The province could not undertake to restore civil salary reduction as long as unemployment relief expenditures piled up the provincial debt, Premier Bracken declared.

Frozen sawdust is used to keep fruit at a uniform temperature.

## Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their "Grip" on Things

Many people "round 40 think they're "growing old." They feel tired a lot... "weak." Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity. When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

**PHILLIPS' Milk of Magnesia**

## Churchill Shipments

Some Details Given About Operation Of Northern Route In 1934 Season

A total of 4,003,954 bushels of grain and 580 head of cattle were shipped from Churchill in the 1934 season. H. Hon. Arthur Meighen, senate leader, told Senator J. P. B. Casgrain (Lab., Montreal) in the upper house.

The price per head of cattle for ocean freight was 75 shillings on the first shipment and 77 shillings six pence on the second, both subject to 10 per cent deduction for cattle weighing less than 1,000 pounds. The cost for maintenance, repairs and so forth to the government elevators at Churchill was \$28,600. Fifty-two men were employed during the 1934 navigation season at this elevator and they received \$48,700.

Total amount paid for general use of this elevator by shippers was \$102,582, and the cost to the government for the operation of the port during last season was \$95,039 for the port alone, and not including cost of maintenance repairs and operation of government harbor.

Total receipts of the port during the last season amounted to \$12,250 for the port, exclusive of elevator receipts. The date of arrival in 1934 of the first ocean ship at Churchill was August 13. The vessel landed 1,849 net tons and paid port dues of \$1,348. Date of departure in 1934 of the last ocean ship from Churchill was Oct. 4, and this vessel carried across the Atlantic 582 net tons of flour and mill products, 1,223,492 lb. dressed lumber and 228,800 bushels of wheat.

## An Unusual Telescope

Made By English Farm Boy From Odds And Ends

The twenty-four-year-old son of an English farmer has discovered a new way of hitching his wagon to the stars. He has actually turned part of his farm wagon into an astronomical telescope. C. H. Leake, of Hereford, wanted a telescope, but farming is none too prosperous even in England these days, and purchase was out of the question. He considered a metal tube fifteen feet long from some old metal drums used by his father for the storage of hop-spraying powder, collected a few split pins from a worn-out farm wagon, some odds and ends from second-hand places, a bit of wood from a wheelbarrow, and with these, and some other odds and ends, disappeared into the barn which he used as a workshop. After nine months, working in his spare time, he actually mounted a magnificent focusing telescope in the kitchen garden. "I did have to buy a piece of glass for the mirror," he explains, "but I silvered it myself." Most telescopes have a clockwork movement for following the path of a star, and Mr. Leake went up to London to look for a second-hand clock. The cheapest he could get of the required size would cost \$450, so he came home and invented a water-clock mechanism instead. And it works perfectly, with a little glycerine added on cold winter nights to prevent freezing. So there he is, with a real telescope of 140 inch focal length, that brings the stars some five hundred times nearer to his Hereford garden.—The New Outlook (Toronto).

## Pass Difficult Examination

Seven Women Inspectors Of Income Tax In England

Are we producing a new race of women? The examination for inspectors of income tax in England is regarded as one of the most difficult of all competitions, and the post itself as one of the most responsible in the civil service.

Miss I. M. Rae was successful at the recent examination and has just been appointed to Manchester. In the new subject of "personality" she was awarded 270 marks out of a maximum of 300. She beat 300 university men out of the 304 who competed. None of the 60 other women candidates did as well.

Among the optional subjects chosen by Miss Rae were economics, business organization, Latin and ancient Greece. A feature of recent examinations is the preference shown by women for economics. It is much more popular with them than with the men.

Seven women have now received appointments as inspectors of income tax as a result of the recent examination, and they chose economics.

It has been figured that 40,000 articles require gas heat at some stage of their manufacture.

## Don't lose FAVORITE RECIPES

Send to you postpaid for 25 cents, or with the cook book for 50 cents. Send today for your copies to Dept. 635, Western Canada Flour Mills Co., Limited, Toronto, Montreal, Winnipeg or Calgary.

## Attorney Met With Failure

German Inventor's Rocket For Mail Delivery Did Not Work

The rocket mail delivery sponsored by Herr Zucker, the young German inventor, was recently attempted and failed. It was his intention to send a parcel of mails by rocket from the island of Scarpa to the mainland of Harris, half a mile distant. The first experiment failed. The firing apparatus, consisting of a slight wooden runway, with metal hoops to direct the rocket, was set up on the shore at Scarpa, and the rocket, which with its contents weighed 30 pounds, was placed upon it. Herr Zucker connected up the electric fuse, and pressed the button. Instead of the rocket shooting over the Sound of Scarpa, there was a dull explosion, and when the smoke cleared the wreckage of the runway and the rocket was seen on the shore, with the letters strewn about. Another attempt was made, but again there was an explosion, and the letters which have survived were handed to the Post Office for delivery in the ordinary way.

Vicar: "I was grieved to hear your husband has gone at last." Mrs. Black: "Yes, e 'as, sir, and only hope e's gone where I know e 'ain't."

Of the entire population of the United States, 43 per cent. live in areas directly served by scheduled air lines.

## Tribute To King George

United States Paper Gifts British Ruler Unstinted Praise

By birth or by training, by innate gift or by abundant experience, King George V. has achieved spiritual maturity. The process may not matter, but it happens that the result is an endowment of the whole world. Americans gladly salute the good neighbor whose unpretending genius is a present asset in an earth in which civilization requires friends.

How different it might be if this royal gentleman were a less rational person! Again and again in recent years the international apple cart might have been overturned had he indulged in political experimentation or engaged in frothy adventures of conquest. It is difficult to imagine him rattling sabres or talking of a military partnership with the delirious. Monarchs, like humbler individuals, act within the limits of a psychological mould, and the temperament of King George is manly and just, considerate and merciful.

Soon he will celebrate his jubilee, and the people of the United States, it may be expected, will find ways to signify to him at that time their appreciation and their gratitude. The English-speaking nations never may be embraced in a single union, but the ties which bind them in independent friendship are growing stronger, and King George is entitled to much of the credit in the circumstances.—Washington Star.

## Ontario Has Largest Cable Testing Machine

Worked By Electricity Has Pulling Capacity Exceeding 1,000,000

Largest machine of its kind in the British Empire, the cable testing apparatus in the Ontario Department of Mines was used to test a cable for use in one of the large Ontario mines and designed to handle loads of 500,000 pounds. The cable stood a strain of more than 300,000 pounds before breaking.

Officials said all new cables used in the mines must be able to pull at least six times as much as the actual load before breaking under the strain. The specimen carried out the requirement.

The machine, which works by electricity, has a pulling capacity exceeding 1,000,000 pounds. Only once has it failed to break a wire. The wire which caused the failure was a sample of cable three and one-half inches thick, used for preventing ships striking sides of locks in the New Welland canal.

## New Blasting Explosive

Resists All Ordinary Means Of Detonation In Tests

A new powerful explosive, described as "so safe that babies may play with it," was given a successful test in an isolated spot in the South Jersey peninsulas, New Jersey.

The blasting material, called "Nitramon" by the E. I. Du Pont de Nemours Company of Wilmington, Delaware, resisted all ordinary means of detonation, including firing of an army rifle bullet into it.

Clamoring the demonstration, Du Pont workers exhibited how they set off the nitramon by using a large diameter cartridge of dynamite.

Gaitas, Spanish bagpipes, dating back to the ninth century, and other historic musical instruments from Spain are soon to be heard in broadcast.

Chronic rheumatism, usually called arthritis, has been termed the "most important industrial and social disease in the temperate zones of America." 2089.

**PURITY FLOUR**  
BEST FOR ALL YOUR BAKING

## Little Helps For This Week

"Now no chattering for the present seemeth to be joyous, but grievous; nevertheless afterward it yieldeth the peaceable fruit of righteousness unto them which are exercised thereby." Hebrew 11:2

I cannot say, Beneath the pressure of life's cares to-day, I joy in thee; But I can say That I had rather walk this rugged way, If Him it please. S. G. Browning.

The particular annoyance which befall you this morning; the vexatious words which meet your ear and grieved your spirit, the disappointment which was His appointment for to-day; the slight but hindering ailment; the presence of someone who was a grief of mind to you; whatever on this day seems not joyous but grievous, is linked in the "good pleasure of His goodness" with a corresponding afterward of "peaceable fruit," from which seed shall spring and ripen.

## Record Railway Run

British Locomotive Attains Speed Of 88 Miles An Hour

A record average speed of 68 miles an hour was made by the London and Northwestern Railway train on the 268-mile run between King's Cross and Newcastle recently. A high speed of 88 1/2 miles an hour was reached en route.

The engine was the Pacific type used for some time on the famous Flying Scotsman.

## Tested Eczema Remedy

Is Prescription Of Doctor

Your skin trouble—whether it is eczema, scab, hives, dandruff, ringworm infection or pimples and blotches—will be positively benefited by D.D.D. because D.D.D. is a tried and tested Physician's Prescription. D.D.D. was developed originally for his own patients by Dr. H. D. Dennis. It is now manufactured by the makers of Campana's Italian Balm. In 35 years D.D.D. has brought clear, healthy skin to millions. As drugstore. Trial size 50c. Guaranteed to give instant relief or money refunded.

Approximately 20 per cent. of all school children under the age of 20 have defective sight.

Eight hundred and fifty words are all you need to know to carry on an ordinary conversation.

The car we like best is still the drier. 2089.

## The "Lift" and Energy of Cod Liver Oil

**PLUS GREATER EFFICIENCY**

Vitamins A and D, abundantly found in Scott's Emulsion, bolster up tired, winter-worn bodies, restoring vitality and strength. But Scott's Emulsion gives you more: Emulsification—the minute breaking up of the particles—making for quicker assimilation, easier digestibility. Yet none of the virtues of pure cod liver oil are lost. One of the PLUS values you get only in Scott's Emulsion.

**SCOTT'S EMULSION**

THE COD LIVER OIL WITH THE PLUS VALUE For Sale by Your Druggist

Various species of rhinoceros were abundant in North America, millions of years ago.

An engineer sounds 19 different signals on his train's whistle.

**Rheumatism** is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—50c a box at all druggists.

## HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy complexion is both happy and popular.

Perhaps you are not really ill yet when the day work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let it help you too!

## from The Call

### Here and There

A S. Empress of Japan arrived at Victoria recently with one of the largest passenger lists in the past three years. There was a total of 577 from the Orient and Honolulu. The liner was also heavily booked for the westbound trip from Vancouver and Victoria.

Speaking at Toronto recently before members of the International Building Owners and Managers Association, E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, doubted the wisdom of "too elaborate planning" in national economies. Mr. Beatty did not think the present system of society was wrong except in the "way in which it is applied."

The Canadian Pacific Railway will celebrate the fiftieth anniversary of the completion of its transcontinental line next year. It was November 7, 1885 that Donald A. Smith, later Lord Strathcona, drove the last spike at Gravelly Hill joining east to west and Atlantic to Pacific.

Hon. Charles A. Dunning, vice-president and general manager of the Seignior Club, Montebello, Quebec, has been elected a director of Barclay's Bank, Canada. The former Federal Minister of Finance is also president of the Ontario Equitable Life Insurance Company.

The vehicle of the future will be an automobile that can also take off into the air, or an airplane that can land and travel along the highways, a speaker addressing the Society of Automobile Engineers told his audience at the Royal York, Toronto, recently.

Canadian scenery dwarfs that of Scotland, a lake in the Gatineau Valley was more magnificent than Loch Lomond while Lake Louise in the Rockies was to him almost a celestial vision, according to Lord Macmillan, chairman of the Royal Commission on Building, expressed just prior to sailing on the Empress of Britain for England.

Informal discussion on closer working relations between the Canadian railways and aviation companies of the Dominion are in progress. With Canada lying on the most direct route between Europe and the Orient, this country is in a unique position to take care of a large proportion of the traffic now moving between Europe and the East.

Constituting what is regarded as the finest collection of mounted aquatic-fauna specimens ever assembled from the same locality in a single season, seven fine specimens of this variety and one rainbow trout were entered in the Nipigon River Camp Guides mounted trout contest recently judged and prize awarded by the Tourist Department of the Canadian Pacific Railway.

(Continued from page 1)

unfolding overhead are not more numerous than the fledgling aspirations that men can no longer hide.

Some may say this is an idealist's delusion, that the warmth and color of the season produce a response which men confuse with hope. For such as say so, it may be true. But those who work and play in the promise of a spring not yet arrived know better. For they have tasted all its joys—at least once—between blizzards. And they have been busy at heart ever since to welcome them.

### WE LIKE TO GET ALL THE LOCAL NEWS POSSIBLE

The main aim of the weekly newspaper, as the name implies, is to give news of its own district. It may have other aims, such as to give the business men a chance to tell of their wares in its columns or to try to influence public opinion through its editorials; but first of all it must give the news. Some of this news is not easily obtained and no editor can cover it all without assistance. Especially is this true when you have visitors. Many of the ladies think that persons are the most interesting reading in the whole paper. Your visitors are usually glad to have their names appear, so send them in. Sometimes people come in and give the impression that they are asking a favor when they want us to insert the names of their friends who have been spending a few days with them. No person need feel that way about giving us news items for we are glad to get them all.

Spring's other annoyances and discomforts could be put up with gracefully were it not for those common ailments of grip and colds which are most prevalent in spring. People who get plenty of fresh air, who ventilate their homes thoroughly, who avoid drafts and wet feet, and who are careful to take a good amount of exercise are the ones least afflicted. Fresh air is a wonderful medicine.

In the Baroque region of Africa the native women hunt and fish while the men do the cooking.

## Town & District

D. Johnston has returned to town quite recovered from his recent severe illness. Mr. Johnston expects to be able to resume his duties with the C. P. R. in a week or so.

The members of the Gleichen Wheat Pool held a meeting at the Meadowbrook Hall Monday evening. Lew Hutchison a director of the Pool, Calgary, addressed the meeting. He spoke of the necessity of members keeping up the membership of the Pool.

M. Bolinger, Fred Jones and O. Lindquist have been selected as Gleichen Social Credit delegates to attend the convention in Strathmore this week.

Tom Fabey, who has been a resident of the Gleichen district for many years, left on Friday for his old home in Slovakia. Tom worked for several years with the C. P. R. section crews in Gleichen and of late has been working on the farms hereabouts. Tom is a very fine fellow and was a straight all them make 'em and the business men of Gleichen regret him leaving, but hope to see him back again.

The Women's Association of Gleichen United Church are holding a Dafoodi Tea and sale of home cooking at the Legion Hall, Saturday, March 23rd, at 3 p.m.

Mr. and Mrs. R. McQueen left Saturday for Ontario where they will visit for a short time. While in the east Mr. McQueen will purchase a new auto in which he and Mrs. McQueen will return home.

Jack Lester and Dan McLeod dropped into this office the other day and gleefully announced that they had figured out a way to put a roof on the rink without it costing anybody a cent. They propose to circulate a petition asking all to give the first \$25 in social credit certificates they receive to the rink. A little over two hundred names applied to this would fix up the rink in grand style. They went on to state that if the donor handed over his first \$25 it would never be missed because they had never received it before. At the beginning of next month there would be another certificate to take its place. A lot of people have signified their willingness to sign, so get busy fellows.

The annual banquet and dance put on by the Queenstown members of the Gleichen Branch of the Canadian Legion will be held in the Queenstown Hall on Wednesday April 3rd. As usual the banquet will be an elaborate affair and several speakers of prominence will be on hand for the occasion. The dance to follow will also be an enjoyable affair and all are cordially invited to attend the dance.

St. Patrick's Day passed off quietly in town. Not one sprig of Shamrock or a plume of green was to be seen.

The old timers hockey and sports night which was to have taken place last Friday was postponed until next winter. It is hoped that this slight delay will not inconvenience the fans. The weather played havoc with the ice hence the delay.

Another fight over Social Credit took place recently. This time it happened down the line. There is an old saying that "the hand is quicker than the eye." We always thought this referred to card tricks as we have seen many a pocket book suffer to find this out. But apparently there are other ways that prove the "hand is faster than the eye," since in the fight referred to the eye was on the receiving end of a flying fist. It might be added the fracas stopped right there.

A wedding reception was held on Tuesday, March 12th, at the home of Mr. and Mrs. G. Riches at Arrowwood, in honor of Mr. and Mrs. S. Moss. Among the invited guests were Mr. and Mrs. Sam Moss, Mr. and Mrs. A. Smith, Mr. and Mrs. T. Lloyd and son, Mr. and Mrs. A. Maynard, Mr. and Mrs. G. Allat, Mr. and Mrs. R. House and son, Mr. and Mrs. G. Riches, Miss Gates, Miss L. Rubbelko, Miss Maxine and Louise Allat, Kathleen and Ivy Riches, Mr. W. Grave, Mr. H. Salter, Mr. G. Roberts, Mr. A. Roberts, Mr. D. Miller, Mr. A. Conrad, Mr. D. Moss, Ray and Max Moss.

Oscar Lindquist accompanied by a number of friends attended the Aberhart meeting in Standard Friday night. He reports that there was a great crowd on hand.

In Yakutsk, Siberia, temperature ranges from 22 below zero to 102 above have been recorded.

### Sky Line Hiking in the Rockies

Organized trail hiking in the Canadian Rockies will be inaugurated for the coming year by a hike slated to start at Lake Louise. The hike will be a day's journey to the town of Canmore, where the first night's camp will be made. On Sunday, the hikers will start their journey over Sentinel Pass to Moraine Lake, where the first night's camp will be made. On Monday, the hikers will start their journey over the Bow River to the town of Canmore, where the first night's camp will be made. On Tuesday, the hikers will start their journey over the Bow River to the town of Canmore, where the first night's camp will be made.

at Lake O'Hara. On Sunday the hikers will be able to take in the magnificent scenery around Lake O'Hara, Lake Osa, and Mount O'Hara, and the hikers of the party will be able to enjoy the excellent fishing in Lake O'Hara. The Bow-Neve will be on the hikers' minds before arriving at the town of Canmore, where the first night's camp will be made.
